BIEMH 2012 NEXT APPOINTMENT WITH INNOVATION

The new edition of the **International Machine-Tool Exhibition** has already been scheduled for **28 May until 2 June 2012**.

The event, jointly organised by **Bilbao Exhibition Centre (BEC)** and the **Spanish Association of Machine-Tool Manufacturers (AFM)**, is a must for this sector, bringing together global benchmark manufacturers and distributors. In fact, the **BIEMH** is regarded as the third most relevant exhibition in Europe in this field.

The 27th edition of BIEMH intends to become a top-level meeting point regarding technology and innovation in the sector. Both exhibitors and visitors will find a perfect framework to get to know and showcase the latest services and technologies, and to settle new trade relations.

BIEMH 2010 BEATING THE CRISIS

In spite of the global financial crisis, the **26th edition of the International Machine-Tool Exhibition**, held from 31 May until 5 June 2010, achieved an unexpected success.

The attending firms showcased the state-of-the-art innovations and developments in machinery and technology. In addition, **more than 35,000 professional visitors** from **54 countries** established significant contacts and reached relevant business deals.

Companies with great purchasing power from domestic and international strategic markets attended the venue. For instance, some European countries like Portugal, France, Germany, Turkey and Switzerland were present. Moreover, other countries such as India, Argentina, Russia, Brazil, Maghreb, Chile, Israel, China and Mexico were also represented. On the domestic front, besides the Basque Autonomous Community, other regions like Catalonia, Madrid, Castile and Leon and Navarre were also there.

The event also received **institutional support** at the highest level. The official opening was chaired by Crown Prince Felipe of Spain, the Basque Premier Patxi Lopez and other authorities, which confirms **the relevance of the International Machine-Tool Exhibition**.

REPRESENTATION BY SECTORS

- **MACHINE-TOOLS:** Metal cutting and metal forming.
- **OTHER MACHINERY:** Welding, oxycutting, thermal and surface treatment and rapid tooling.
- **TOOLING FOR MACHINE-TOOLS:** Cutting and forming tools, abrasive products, tool-holding accessories, tooling, presetting and balancing systems and work-holding devices.
- **PARTS, COMPONENTS AND ACCESSORIES:** Accessories, mechanical, hydraulic and pneumatic components, electrical and electronic equipment for machine-tools, control and operation systems, lubrication and cooling, materials, waste disposal systems and industrial safety.
- **MANUFACTURING SYSTEM AUTOMATION:** Handling, storage and transport automation, assembly techniques and systems, work stations, industrial robots and industrial software.
- **METROLOGY AND QUALITY CONTROL:** Measuring devices, testing machines, image data processing and quality control.
- **WORKSHOP & COMPANY SERVICES**
